Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claim 11 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/24/2005.
2. Currently claims 1-10 and 12 are being examined.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 10/18/2001 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 6-10 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Sekine et al (US 6,049,354).

As to claims 1, 7, 9, 10 and 12, Sekine et al disclose a motion image processor, comprising: an acquiring portion for acquiring scene change information indicating a scene change in a motion image (fig.5); and a determining portion for determining,

Art Unit: 2625

when the scene change information is acquired, a correction process for the motion image until next scene change information is acquired (fig.5).

As to claim 2, Sekine et al disclose the motion image processor as claimed in claim 1 (see claim 1 above), further comprising a corrector for correcting the motion image in accordance with the correction process until the next scene change information is acquired (fig.5).

As to claims 3, 6 and 8, Sekien et al disclose the method of claim 1 (see claim 1 above), further comprising storage for storing a plurality of correction processes. Beforehand, and the determining portion selects one correction process from the plurality of correction processes based on an image after the scene change information is acquired (motion correction and image shake correction, correspond to a plurality of correction processes in this claim).

Allowable Subject Matter

6. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
